

WE PROVIDE LEADERSHIP IN DENTISTRY

Egregio Dottore,

Abbiamo il piacere di presentarLe il programma del prossimo Stage di Perfezionamento :

“Advances in Prosthodontics and Aesthetics”

che si svolgerà presso il New York University College of Dentistry dal prossimo 2 al 6 Giugno 2014.

Il College of Dentistry della New York University, oggi la più grande Scuola privata di Odontoiatria degli Stati Uniti, organizza con successo da 30 anni gli **Stage di Specializzazione** dedicati a dentisti stranieri. Questi Stage, della durata di una settimana l'uno, sono articolati in lezioni teoriche, laboratori, esercitazioni pratiche, video live surgeries, etc. che insegnanti del College of Dentistry della NYU o Relatori di fama espressamente invitati preparano e svolgono su diversi temi odontoiatrici.

Gli Stage sono a numero chiuso e sono organizzati con un servizio di **TRADUZIONE IN ITALIANO**, tranne durante il Symposium, dando così la possibilità di seguire le lezioni anche a chi non parla correntemente la lingua Inglese.

La New York University rilascia un attestato di partecipazione alla fine di ogni settimana di lezioni. Al termine del Programma completo di frequenza a sei settimane di Stage (almeno 4 seguite negli U.S.A.) e la presentazione del FINAL WRITTEN REPORT su due casi clinici trattati, viene rilasciato ai partecipanti ***l'International Achievement Certificate in IMPLANTOLOGY & ORAL REHABILITATION.***

La quota di iscrizione allo STAGE è di €2.300 ed è comprensiva di : tasse universitarie, materiali di laboratorio e didattici, coffee-breaks, pranzi.

PROGRAMMA DI VIAGGIO e QUOTE DI PARTECIPAZIONE

Naturalmente l'occasione di studio è anche di vacanza essendo la New York University situata sulla centralissima First Avenue a Manhattan, proprio nel cuore della Grande Mela! Sarà così per Lei possibile visitare agevolmente New York e familiarizzare con questa città unica al mondo.

Per la prenotazione di viaggio ed alloggio le suggerisco di provvedere QUANTO PRIMA alla prenotazione per mezzo dei diversi siti disponibili sul web (Expedia.it – Volagratis – Last minute, etc.) che le potranno offrire una ampia gamma di proposte. In generale un volo dall'Italia e ritorno, prenotato per tempo, costa da €350,00 a €750,00 un buon Hotel a Manhattan da €200 a €300 per notte.

Per ogni ulteriore informazione ci potrà contattare in segreteria al numero 3339553450.

New York University College of Dentistry
Linhart Continuing Dental Education Program

*“Current Concepts in American Dentistry:
Advances in Prosthodontics and Esthetics”*

June 2 - 6, 2014

Monday, June 2, 2014 9:00 a.m. – 4:00 p.m.

Dr. Keith PROGEBIN

Former Associate Clinical Instructor, Department of Prosthodontics and Occlusion, New York University College of Dentistry, Member, Academy of Osseointegration and American College of Prosthodontics; Fellow, Greater New York Academy of Prosthodontics; Private Practice in Advanced Restorative Dentistry and Implant Prosthodontics in Washington, D.C.

“Advanced Implant Esthetics: From Treatment Planning to Final Restorations”

The use of dental implants to restore function and esthetics following the loss of teeth has been well documented. As high implant survival and success rates have been reported, the esthetic outcome has become the main focus of interest in esthetically sensitive areas. The prosthetic reconstruction should imitate the appearance of the natural teeth. Clinical cases will illustrate a stepwise approach of tissue manipulation with the use of provisional restorations to create a subgingival contoured sulcus. With the latest technology, a virtual abutment can achieve natural root replacement contours.

The purpose of this presentation is to discuss advancements in machined abutment design: pre-contoured versus CAD/CAM, metal versus ceramic abutments. Decision criteria will be formulated in order to choose between all ceramic abutments and crowns as well as titanium, gold abutments and ceramometal crowns. The clinician will have a better understanding of abutment selection to achieve the ultimate esthetic integration.

Learner outcomes:

- *Stepwise treatment planning for ideal esthetics and longevity*
- *Understand the development of soft tissue profiles with provisional restorations*
- *Learn immediate provisional restoration techniques for single and multiple prosthesis*
- *Digital Dentistry-Where are we?*
- *Have the ability to select components that are appropriate for patient specific restorations*
- *Management of complications*

Tuesday, June 3, 2014 **8:30 a.m. – 3:30 p.m.**

Dr. Arnold WEISGOLD

Former Clinical Faculty, Ashman Department of Periodontology and Implantology at New York University College of Dentistry; Adjunct Professor and Former Director of Postdoctoral Periodontal Prosthesis, University of Pennsylvania School of Dental Medicine; Editorial Board for Compendium for Continuing Dental Education in Dentistry; International Journal of Periodontics and Restorative Dentistry, Journal of Esthetic Dentistry.

"Esthetic and Gingival Problems of the Single Tooth Implant"
(9:00 a.m. – 12:30 p.m.)

This presentation will deal with the unique features that impact on the esthetic and gingival management of the single tooth implant. In many respects the type of periodontium is as much a factor in success as the actual fixture position. Sulcular form, mesiodistal and facio-lingual location of the fixture, apical positioning of the fixture, ridge morphology and embrasure considerations will be dealt with the detail. The actual position of the artificial crown relative to the adjacent natural teeth and edentulous ridge will be analyzed and the manner in which this is managed will be reviewed. The difficulties involved with positioning implants adjacent to other implants, next to natural teeth and proximity to edentulous areas will be discussed in depth.

Dr. Sang-Choon CHO

Associate Director of Clinical Research and Clinical Assistant Professor in the Ashman Department of Periodontology and Implant Dentistry, New York University, College of Dentistry; Recipient of Advanced Implantology Certificate, New York University; Editorial Board for Journal of Periodontal and Implant Science; Member, Greater New York Academy of Prosthodontics (GNYAP) and OKU. He has published over 20 articles in peer review journals and contributed chapters in 4 textbooks. He currently has a private practice in New York City specializing in Implantology and Dental Aesthetics.

LIVE SURGERY
(1:30 p.m. – 3:30 p.m.)

FINAL WRITTEN REPORTS PRESENTATION SESSION

(4.30 p.m. – 6:00 p.m.)

NYU FACULTY: Prof. H.Kendall BEACHAM
REPORT ADVISOR: Prof. Saverio RAVAZZOLO

Wednesday, June 4, 2014 **9:00 a.m. – 4:00 p.m.**

Dr. Stephen WALLACE

Clinical Associate Professor, New York University College of Dentistry, Department of Implant Dentistry; Clinical Associate Professor, Department of periodontics, Columbia University, Private Practitioner of Periodontics and Implantology in Waterbury, Connecticut; Member of the American Academy of Periodontology and Fellow of the Academy of Osseointegration.

“Advances and Innovations in Sinus Lift Procedures and Augmentation Procedures”

Evidence-based reviews of the sinus augmentation procedures over the past 8 years has shown that implants placed in grafted in maxillary sinuses experience survival rates similar to or better than implants placed in the non-grafted posterior maxilla. The reviews show that utilizing available evidence to select grafting materials, membranes and implant surfaces is what leads to high success rate.

This presentation will focus on the use of that information in the formulation of treatment plans that lead to the most favorable outcomes in the hands of surgeons engaged in the clinical practice. Further research from a data base of over 1,000 sinus augmentation surgeries performed at the NYU Department of Implant Dentistry will be presented examined in a step-by-step manner that will allow the clinician to achieve maximum results with minimum complications. Handling of intraoperative and postoperative complications will be discussed. Topics will include:

- *Evidence-based decision-making for maxillary sinus elevation (proper choice of graft materials and membranes)*
- *Evolution of lateral window sinus elevation techniques through slides and video presentations (rotary handpiece, Piezosurgery, DASK technique)*
- *Transcrestal sinus elevation techniques (osteotome, Physiolift, balloon techniques)*

Thursday, June 5, 2014 **9:00 a.m. – 4:00 p.m.**

Dr. Elliot KRONSTEIN

Elliot Kronstein is a prosthodontist who has been with the The Restorative Dental Group of Cambridge along with 8 other dentists since 1976. He has a special interest in cosmetic and implant restorative dentistry. Elliot is a past president of the Massachusetts section of the American College of Prosthodontists and a Fellow of The Greater New York Academy of Prosthodontics. He is the founder of The Restorative Dental Study Club of Cambridge and The Mini Residency, a 12 month continuing education program for restorative dentists and their surgical colleagues. Dr. Kronstein is a member of the Straumann Speaker Consortium. Dr. Kronstein has been a prosthodontic mentor and a member and speaker for the educational advisory board of Implant Innovations Inc. Elliot is a member of The Academy of Osseointegration, The American College of Prosthodontists, The Greater New York Academy of Prosthodontics, The ADA and The Massachusetts Dental Society.

***“Definitive Predictable Restorations in the Esthetic Zone;
Managing the Variables That Determine Success or Failure” (9:00 a.m. – 12:00 noon)***

The maxillary anterior sextant of the mouth is where dental esthetics happens! On the other hand we know that function and esthetics must go hand in hand. In this presentation we will identify and discuss the variables that if well controlled assist us in accomplishing positive esthetic outcomes that are durable and predictable. Many of the contemporary materials options will be reviewed and numerous case illustrations will be presented.

Learning Points:

- *Learn why it is essential to manage contact points in the esthetic zone*
- *Learn to classify and identify the different types of contact points*
- *Become familiar with the different options of all ceramic materials and learn when each should be utilized*
- *Learn how to manage color and match shades through the use of a spectrophotometer*
- *Learn how to prepare teeth in manners that yield highly esthetic results while still being compatible with periodontal health*

**“Predictable Restorative Strategies for Implant Supported Restorations, Success by Design”
(1:00 p.m. – 4:00 p.m.)**

Is it possible to predict if a papilla will be present after placing an implant when teeth are present on either side of that implant? What are the variables that will control its presence or absence? How important is this in the esthetic zone? How do we need to manage the replacement of two consecutive missing teeth in the esthetic zone? Is there a strategy for replacing 2 consecutive missing posterior teeth? If so does that influence the type of fixture that needs to be placed, bone level vs. tissue level? Become familiar with the recommendations of the Academy of Osseointegration and The ITI for the placement of implants in the esthetic zone. This presentation will help you understand in advance what you can expect to accomplish prior to treating the patient.

Learning Points:

- *Implants next to teeth, what determines the position of the soft tissue and the presence and formation of a papilla?*
- *Can we predict the presence of a papillae between 2 adjacent implants? Do we need to have different strategies for the anterior vs. posterior regions of the mouth?*
- *Variables that determine the height of bone between two adjacent implants*
- *Strategies to manage the restoration of 2 consecutive missing teeth*
- *Management of missing mandibular incisors*
- *Learn to identify and classify different types of transition zones and implant diameter and how they affect subgingival emergence profile*
- *Full arch implant supported fixed restorations: Is there an ideal configuration of implants?*

Friday, June 6, 2014 8:30 a.m. – 12:30 p.m.

Dr. Ziad JALBOUT

Clinical Associate Professor, Department of Periodontology and Implant Dentistry at New York University College of Dentistry; Director of the Implant Honors Program, and Director of the Fundamentals of Implant Dentistry Course, at New York University College of Dentistry; Member of the International Congress of Oral Implantologists,; Author of Numerous Articles on Aesthetics and Implants including the Glossary of Implant Dentistry; Private Practice in New Jersey and New York City.

“Minimally Invasive Surgery: Concepts and Clinical Practice”

This lecture discusses the concept of minimally invasive implant surgery. This concept is illustrated through the use of flap less surgery, atraumatic extraction, immediate implant placement and provisionalization, the use of short implants, and osteotome sinus elevation simultaneously with implant placement.

Learning objectives:

- *Minimally invasive surgery in implant dentistry*
- *Soft tissue preservation and protection concept*
- *Atraumatic extraction concept and technique*
- *Multidisciplinary approach to anterior aesthetic cases*
- *The osteotome sinus approach*
- *The use of short implants*
