"New Advances on Immediate Loading of Dental Implants and Sinus Lift"

prof. George E. ROMANOS

Professor and Associate Dean for Clinical Affairs, Stony Brook University School of Dental Medicine, Stony Brook, New York; Adjunct Professor of Clinical Dentistry & Director of the Unit of Laser Dentistry at Eastman Institute for Oral Health in Rochester, New York; Former Clinical Professor, Department of Implant Dentistry, New York University College of Dentistry; Professor (Prof. Dr. med. dent, apl.) of Oral Surgery and Implant Dentistry, Johann Wolfgang Goethe University Frankfurt, Germany; Specialty Training in Periodontics, Prosthodontics and Oral Surgery in Germany and in USA. Diplomate, American Board of Periodontology, Fellow of Int. College of Dentists, ICOI, ITI Foundation and ASLMS; Editorial Board for Int J Oral & Maxillofac. Implants, Clinical Impl Dent and Related Res, J Prosthodontics, NY State Dent J, Associate Editor for J Osseointegration and Odontology; author of 5 books on Lasers and on Implant Dentistry (Quintessence); more than 300 publications and book chapters; well-known national and international speaker.

prof. Carlo Maria SOARDI

Laurea in Medicina e Chirurgia Università degli Studi di Milano, Diploma in Microchirurgia - Anno Accademico 2011/2012 Professore a Contratto presso il Corso di Laurea Magistrale in Odontoiatria e Protesi Dentaria Università “Alma Mater Studiorum” di Bologna. Dall’Anno Accademico 2013/2014 è Professore a Contratto presso il Corso di Laurea Magistrale in Odontoiatria e Protesi Dentaria dell’ Università degli Studi di Modena e Reggio Emilia. È stato docente relatore al Corso Post-Graduate in Chirurgia Implantare presso la Scuola post-universitaria San Raffaele Università Vita Salute di Milano

Program description:

Reconstructive Bone Surgery and Maxillary Sinus Lift are the most effective procedures to solve prosthetic problems in severe maxillo-mandibular atrophies. Many alternative techniques have been proposed in the years, and the precise comprehension of the 3D maxillo-mandibular deficiency is mandatory. Whether addressing specific cosmetic concerns, or providing advanced restorations and rehabilitation, coordinated efforts from specialists in each field of dentistry “improve” and maximize treatment outcomes. The faculty will focus on diagnosis, treatment planning and execution of therapy, both from the unique perspective of the restorative dentist, the periodontist and the surgeon, and from the higher level of understanding attained through their synergistic interactions in the exciting evolving field of **ADVANCED IMMEDIATE LOADING** and the new specialty of **OSTEO-PERIO-IMPLANTOLOGY**.

Saturday November 8th , 2014

08.30 – 08.45 - registrazione partecipanti

09.00 - 09.15 - welcome - introduction

09.00 - 16.30 **George ROMANOS**

Immediate loading has been accepted as an evidence based concept in the anterior part of the mandible. The presentation will focus on the immediate functional concept of implants placed in poor bone qualities and compromised bone metabolism. The main characteristics of the implant design, implant/abutment connection as well as the requirements for a successful treatment will be demonstrated.

The second part of this presentation will be focused on the laser treatment in implant dentistry. The clinician will be able to learn more about the different laser wavelengths, the laser-tissue interactions as well as their applications in implant dentistry. The preparation will illustrate a high number of perimplantitis cases as well as the long term clinical outcome after the use of implant surface decontamination using lasers.

17.00 – 18.00 **Carlo Maria SOARDI**
